Bespoke is a sexy word. Don't lie, you know it is. Something about it, maybe just the word spoke, which when thinking of food and drink is often attached to speakeasies and despite the violence that surrounded the time period in which alcohol was forbidden, we've romanticized it because it was also a time of liberation for (mostly white) women and their libidos and appetite for booze. Because of this, a word like bespoke immediately conjures up images of golden hues, jazz music and cocktails in glasses modeled after the breasts of old queens. The word itself has a very different, but still sexy, definition.

***Bespoke: adj, made to fit a particular person.***
